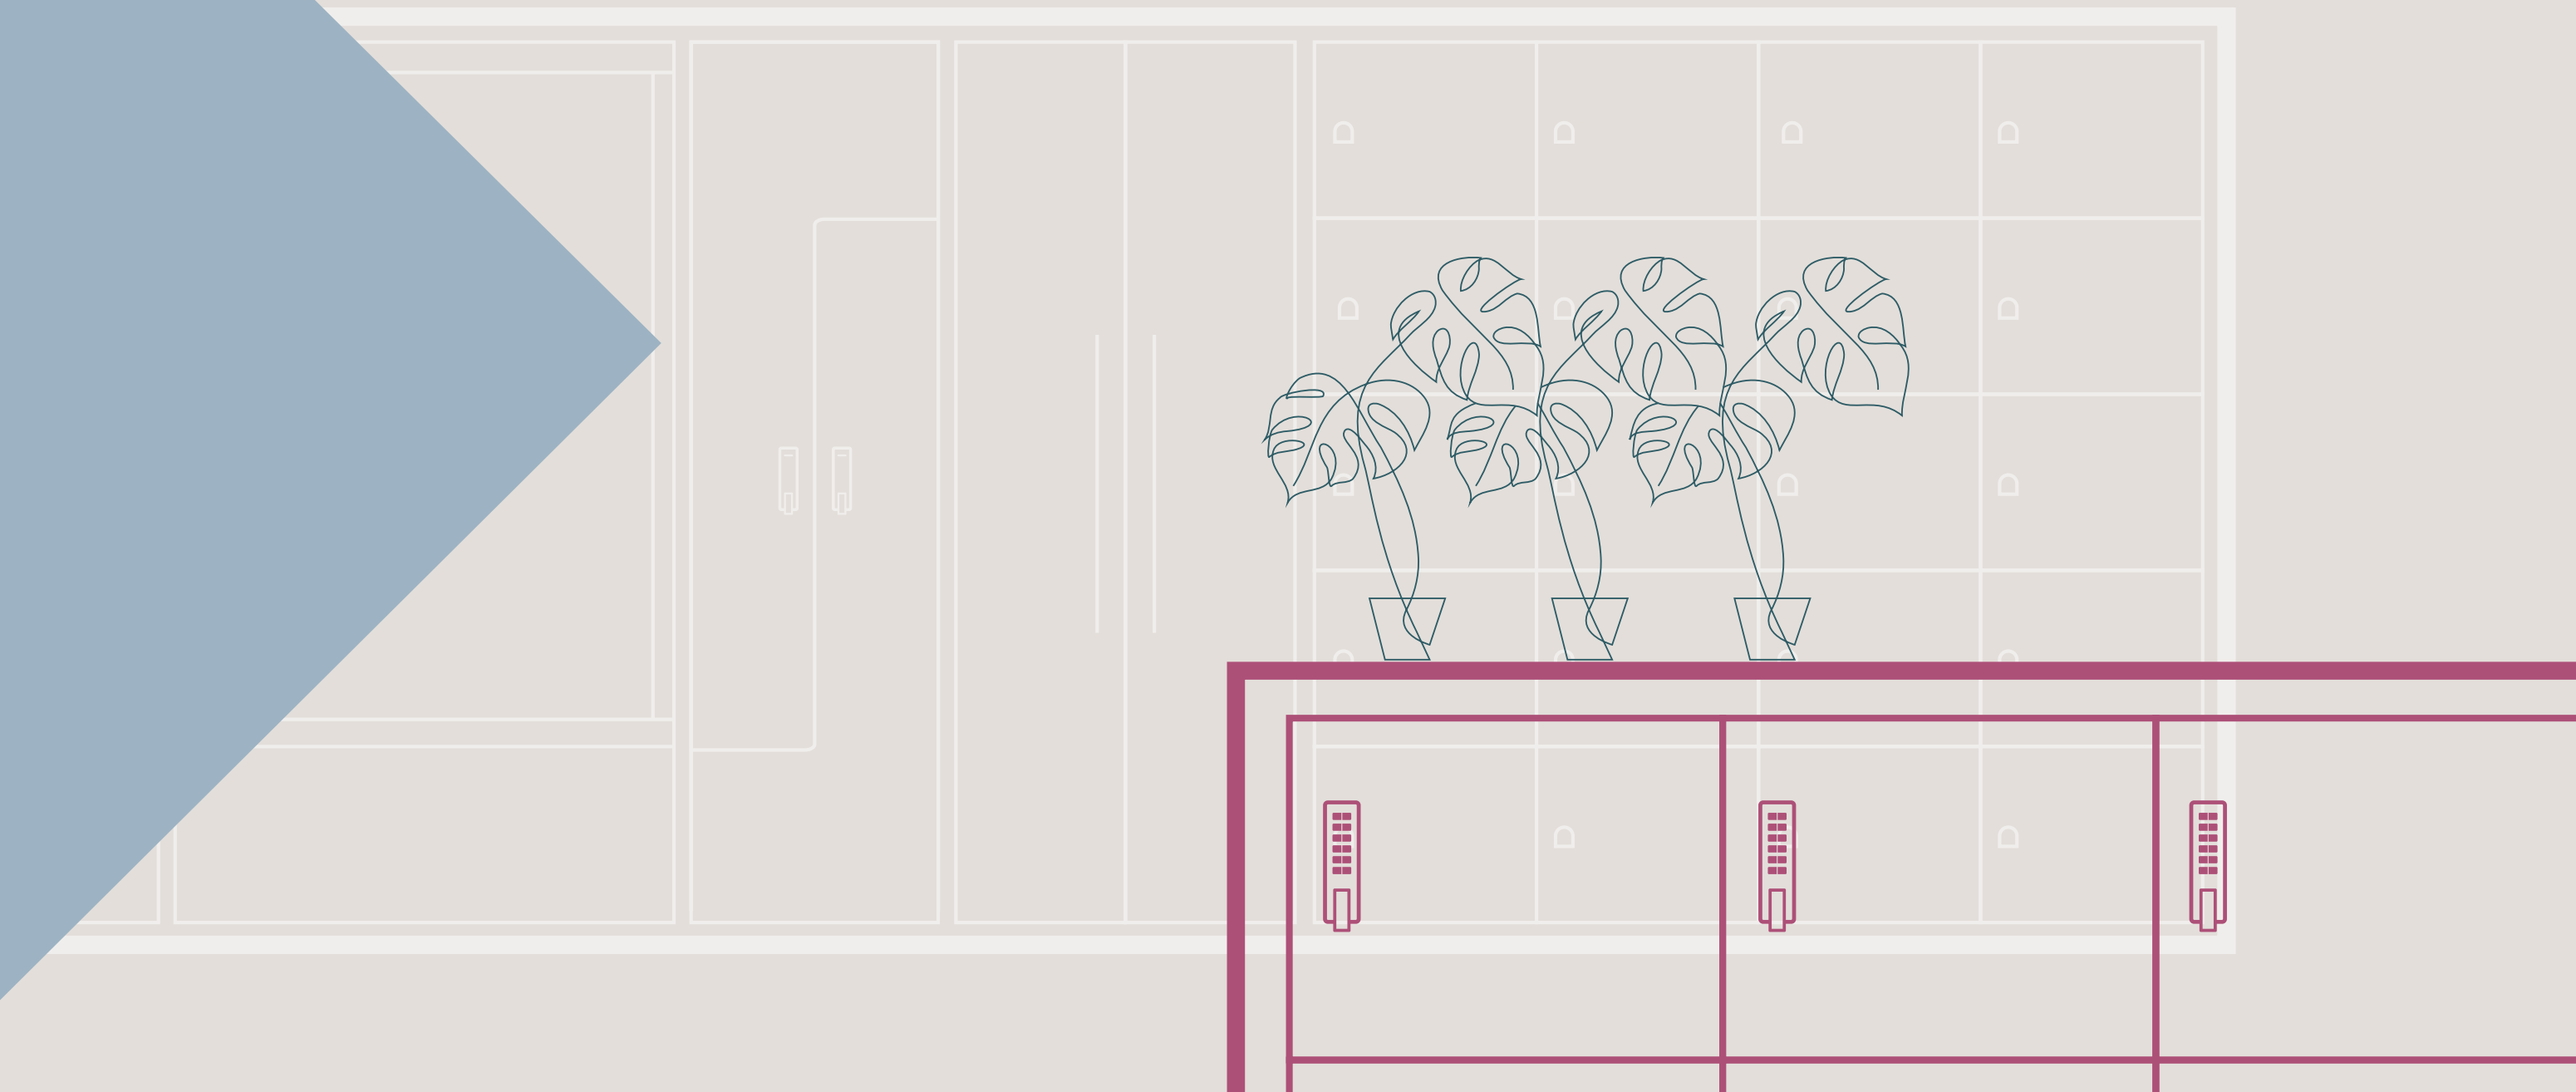
LockerWall

BISLEY



LOCKERWALL

LockerWall by Bisley is the fully integrated, optimum storage and smart locker system that delivers dependable security, without dominating your space or sacrificing your style. Utilising the latest smart locking software, including networked and hard wired locks, personal storage and facility management has never been simpler and safer.

The rise in personal stowage requirements is at the forefront of a modern, productive workplace. What was once banished to cloakrooms or basements is now a firmly established part of the front office landscape.

Our personal storage solutions can help free up space, promote productivity and give everyone a sense of belonging.

WHY CHOOSE US

Manufacturing excellence that’s engineered around you.

We’re proud to be a full manufacturer that really is Made in Britain - we manufacture all our own furniture in the UK and export all around the globe - from Wales to the world.

Our lead times are constant. As we are the manufacturer, we are not reliant on third-party suppliers. Continually looking to invest in our factory and practices, we practice Lean Manufacturing techniques, and have invested over £2m in machinery in the last 2 years in our all-new wood plant at our site in South Wales.

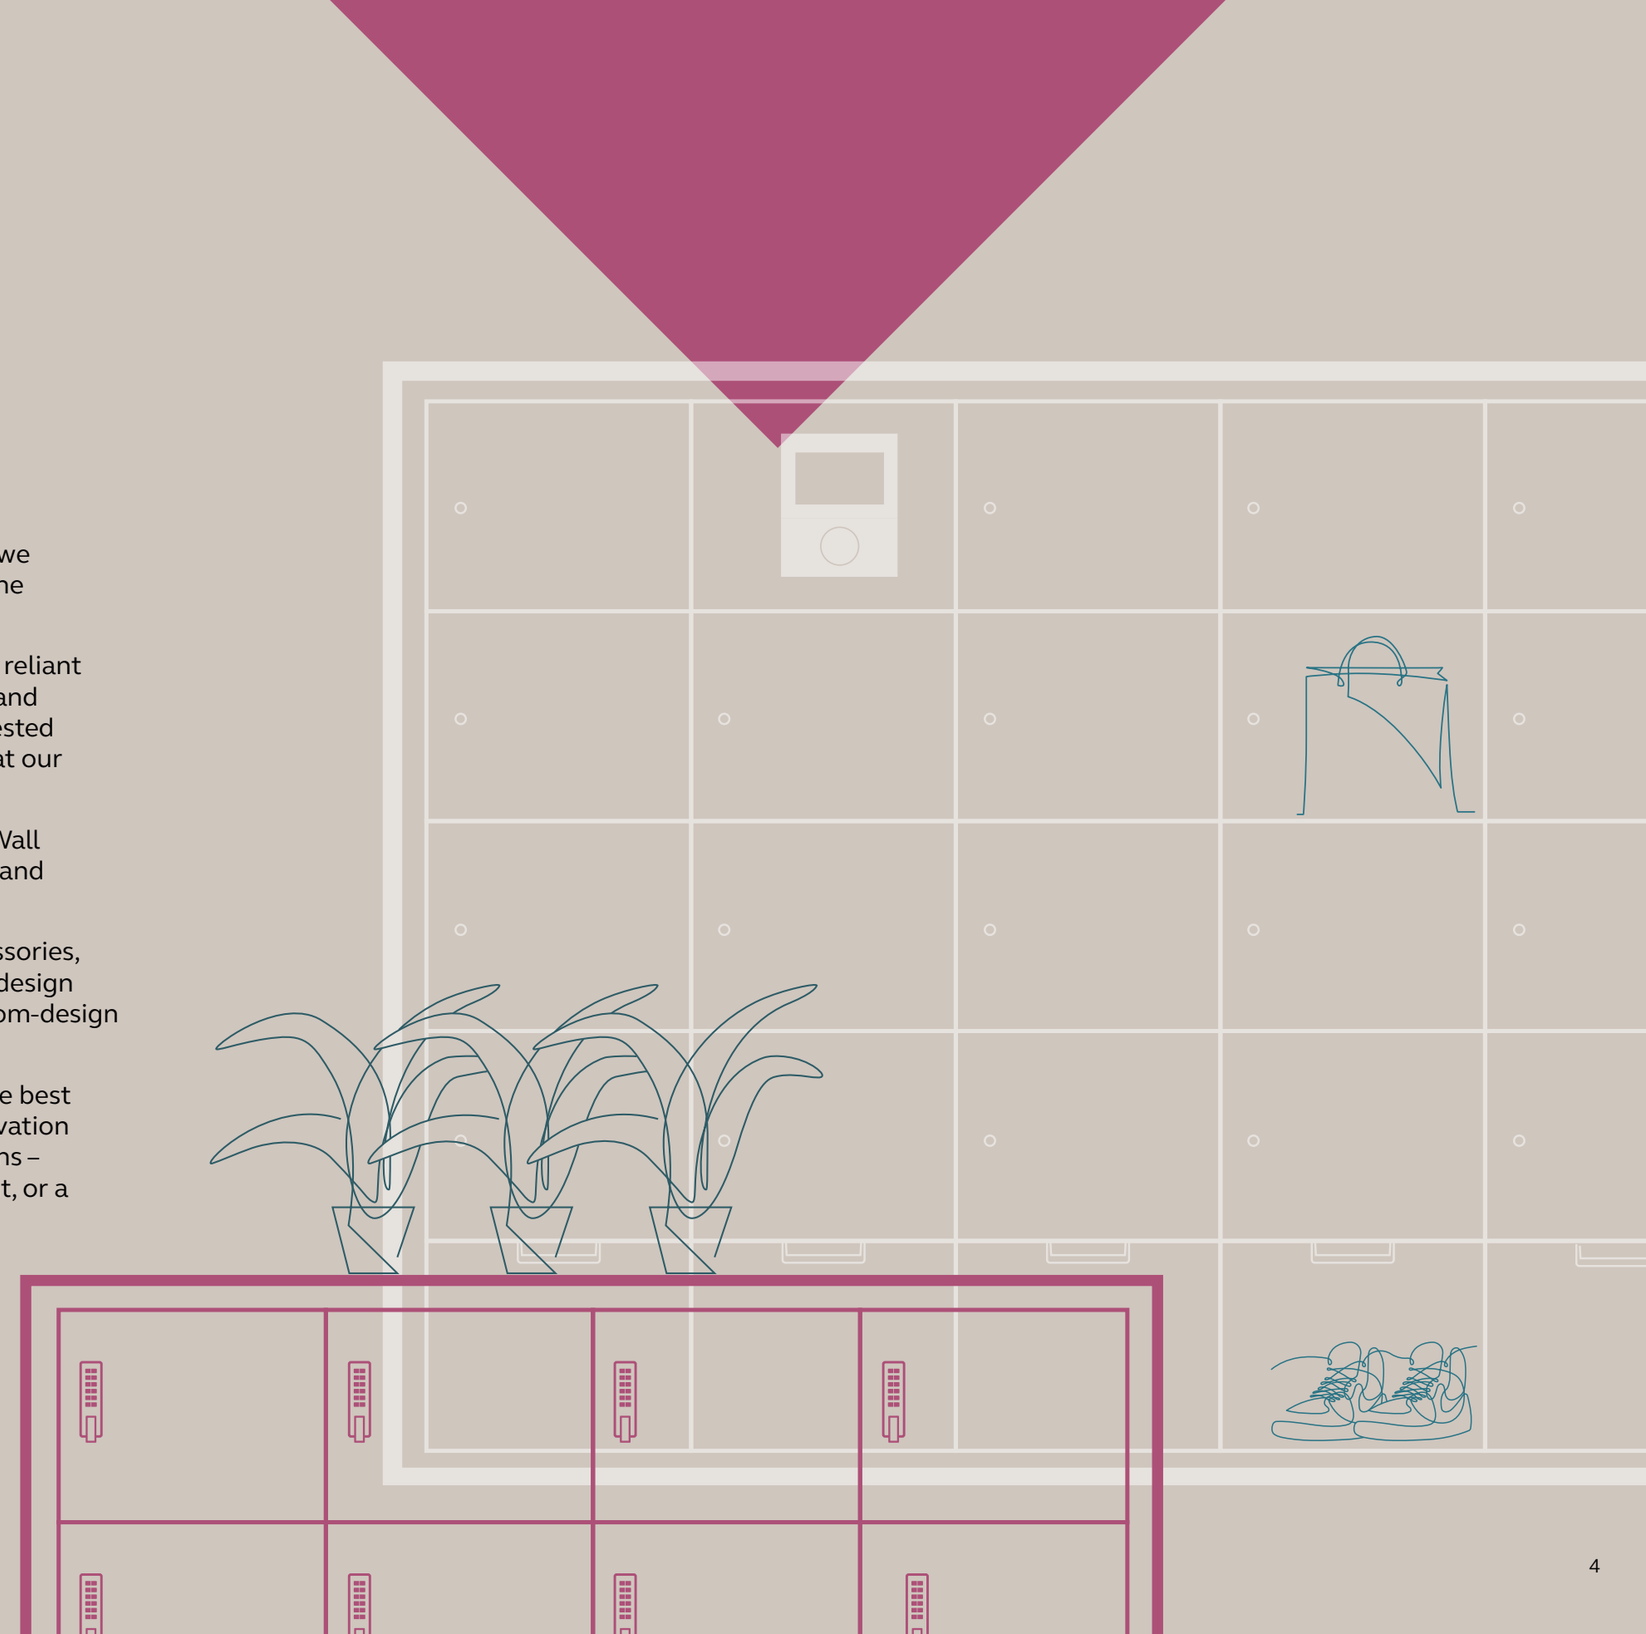
We are experts in the production of steel and wood storage. LockerWall combines this with smart lock technology including the latest wired and wireless smart locking solutions for peace of mind.

We can talk you through all the options – from dimensions and accessories, to colors and finishes, or even assist with putting together a precise design specification. Whatever the project size or requirement, we can custom-design and custom-build LockerWall to exactly what you want.

Our expert knowledge is on hand to work for you, helping you get the best from your Lockerwall; we can provide full site surveys, plans and elevation drawings as required. And, we can produce various installation options – whether you need product installation training and site management, or a full delivery and installation service.

Whatever you need, wherever you need it, we’ll take care of it.

- Europe's leading manufacturer of steel storage with an on site state-of-the-art wood plant
- Over 80 years of award-winning design expertise
- 15,000 products leave our South Wales factory every week
- Expertise in the latest lock solutions including smart locking software



WALL SPACE

A smarter use of your space

Inspired by the traditional locker system, but re-imagined for the contemporary office, LockerWall does what it says on the tin; delivering optimum storage in a sleek, stylish system to suit your organisation's esthetic. Connect locker and storage modules together to run along empty walls or fill existing alcoves, making the best use of your space and giving colleagues peace of mind whilst at work.

OPEN SPACE

Storage that works harder

LockerWall is not only a storage system - the lower height lockers can create zoning and space division, giving a workplace defined neighbourhoods. The standing height options double up as an impromptu work surface, or they can be accessorized with planters to bring in mood boosting biophilia.

Designed to fit around you

LockerWall is modular and entirely bespoke, meaning it can flex to create a variety of different workplace settings, outside of the desk. Each column is individual so you can select every unit with your colleagues' needs in mind. Not only is there a huge choice of lockers, but you can mix and match with larger storage cupboards, coat cupboards, bookshelves and soft seating nooks. Whether you want to create a beautiful guest welcome area, dedicated spaces to catch up between meetings or pleasant, functional breakout zones, LockerWall delivers so much more than just storage.

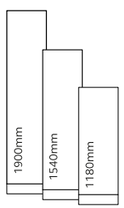
A GUIDE TO SPECIFYING LOCKERWALL

We are here to help

REQUEST A CALLBACK



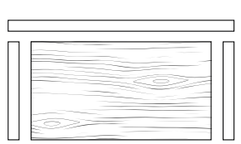
1 Select your modules

There are 3 heights of LockerWall modules available: 74.8”, 60.6” and 46.5” high.

- Storage cupboards, coat cupboards and bookcase modules are all available in 74.8” high only.
- All locker modules have a choice of **3 lock options** as standard: AB, E4 or M3. Storage cupboards and coat cupboards are fitted with AB locks as standard.
- **Other lock options** including electronic locks are available and our team is on hand to find the best choice for your needs.

All available modules can be found in the range overview.

View the range overview

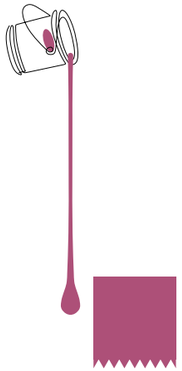


2 Select your finishing panels

Whether you are designing a freestanding bank of LockerWall or planning to scribe your configuration into an alcove, you will need to select MFC finishing panels.

See our visual guide to finishing panels.

View guide



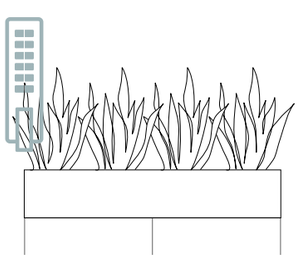
3 Customise your creation

When specifying your LockerWall finishes, there are 4 stages: module doors, carcase, finishing panels and perch pad material (if applicable).

- All carcases and finishing panels including plinths, fascia panels, top, end and back panels are available in wood (MFC) only.*
- All locker doors are available in either wood (MFC), CGL or the Vision painted steel palette.*
- Z doors are only available in CGL.*
- Coat cupboards and storage cupboards are only available in MFC.*
- If you have included a perch pad, the carcase and fascia panel finish must be specified (MFC only).*
- There are over 50 perch pad fabric colors to choose from.

See our huge range of wood, steel and fabric options.

View all finish options



4 Add accessories and locks

Add additional accessories to your storage to perfectly suit the needs of your workforce. Plus, create peace of mind by specifying the best locking solution.

- Add MFC planter tops to your 46.5” and 60.6” high units.
- Additional internal shelves.
- USB power.
- A4 (8.3” x 11.7”) postal slot trays are available in the Vision painted steel palette.
- Label holders for locker doors.
- Self-adhesive coat hooks.

Thinking about adding a graphic to your LockerWall?

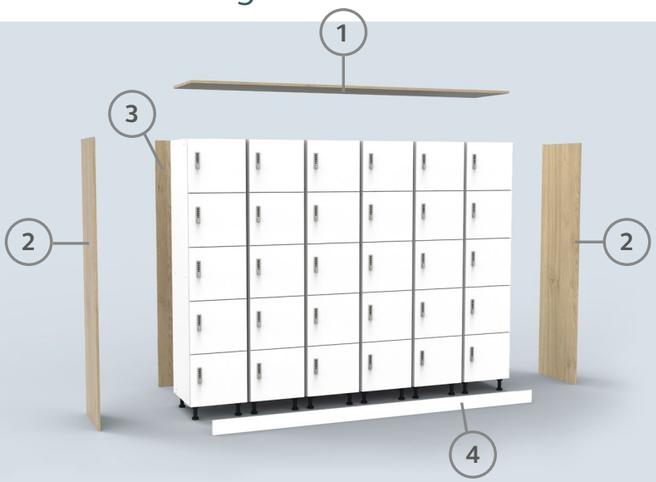
FINISHING PANELS

Whether you are designing a freestanding bank of LockerWall or planning to scribe your configuration into an alcove, you will need to select a variety of MFC finishing panels.

This guide illustrates the panels needed for each LockerWall setting e.g. freestanding, against a wall or scribed in to an alcove.

Please contact your Bisley Representative for all finishing panel sizes.

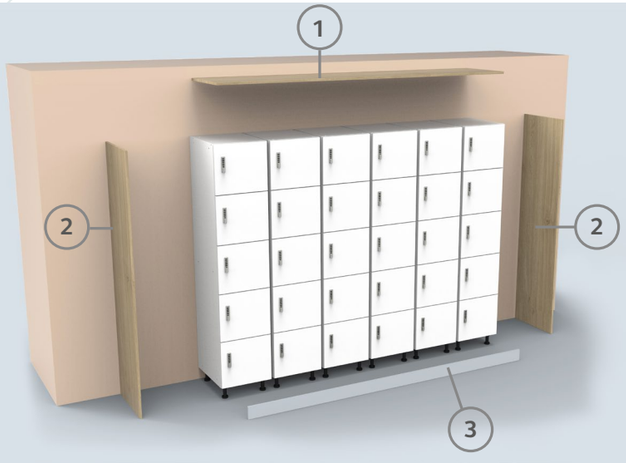
Freestanding



You will need to specify:

1. Top panel(s)
2. Left and right hand end panels
3. Back panel
4. Plinth(s)

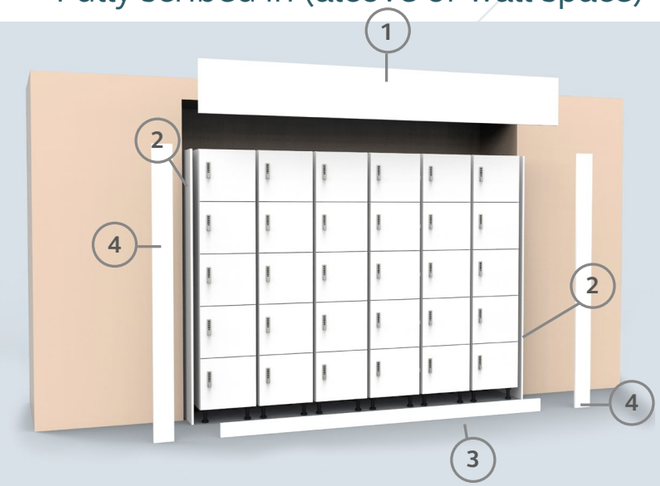
Against a wall



You will need to specify:

1. Top panel(s)
2. Left and right hand end panels
3. Plinth(s)

Fully scribed in (alcove or wall space)



You will need to specify:

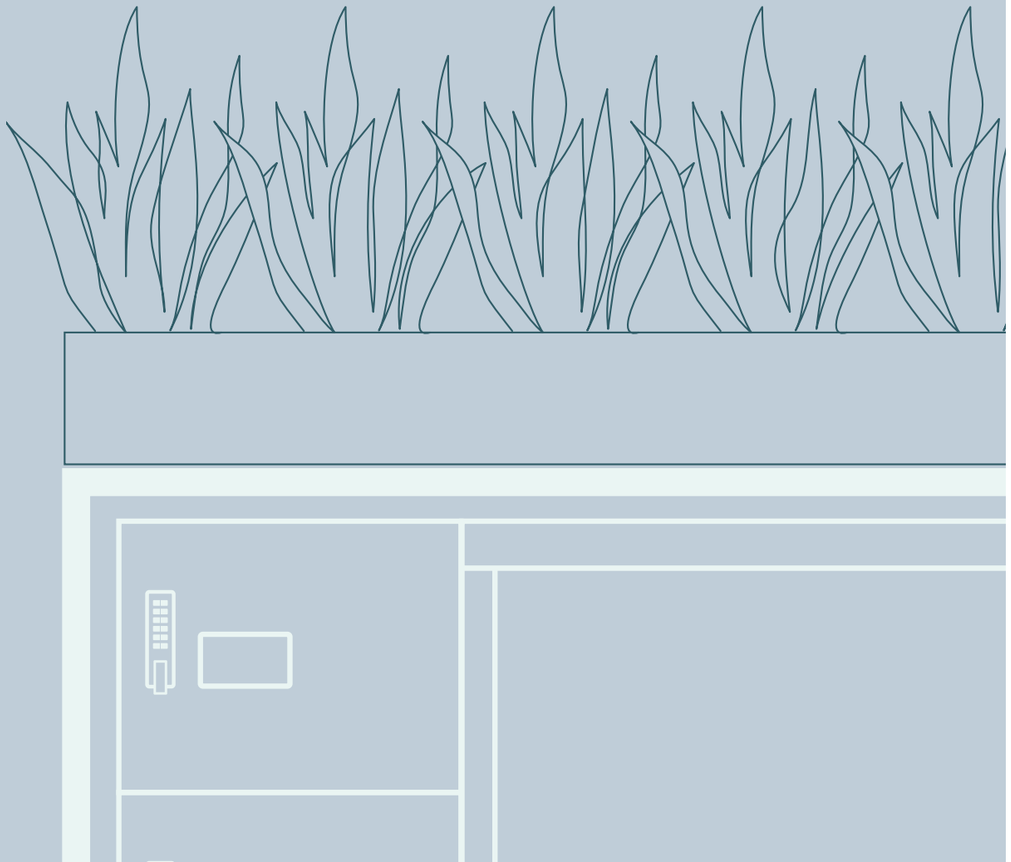
1. Top fascia panel(s)
2. Left and right hand end panels
3. Plinth(s)
4. Infill panel(s) if required

Please note
All additional panels (plinth, infill panels, top fascia panels and end panels) are available in MFC only.

View our MFC finishes here

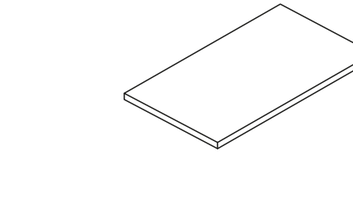
ACCESSORIES

LockerWall helps you reinvent how your office looks, works and flows. And once you've specified your bespoke configuration, you can accessorize with all the essential amenities to provide your workforce with everything they need to be comfortable, organised and productive whilst at work.

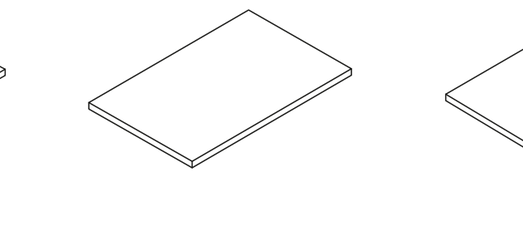


Planter boxes for 46.5" / 1180mm and 60.6" / 1540mm high modules

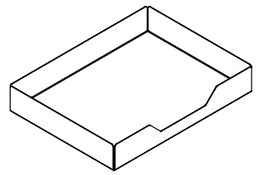
31.5"/800mm wide planter box



39.4"/1000mm wide planter box



A4 (8.3" x 11.7") steel postal slot tray*

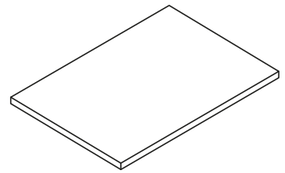


Additional locker internal shelves

11.8"/300mm wide locker shelf

15.7"/400mm wide locker shelf

20.5"/520mm wide locker shelf



USB power within lockers*

Self adhesive coat hook

Label Holder

*Please refer to the **range overview** to find out which modules are compatible.
Please note that USB power cannot be retrofitted.

ACCESSORIES

1 **Self-adhesive coat hook**

Mount these additional hooks anywhere in your LockerWall for handy extra organisation.

2 **Additional adjustable internal shelves**

Add extra storage compartments within each locker. There are three sizes available to fit all three locker widths.

3 **A4 steel postal slot tray**

Available in 33 colors from the steel paint Vision palette. Please refer to the range overview to find out which modules are compatible.

4 **Label holders**

Easy application and ideal for lockers with assigned users.

5 **USB power within lockers**

Users can charge their technology whilst it's securely locked away. Please refer to the range overview to find out which modules are compatible. USB power cannot be retrofitted.

6 **MFC Planter Box**

Bring the outside in and create uplifting biophilia displays by adding MFC planter boxes to the lower height 46.5"/1180mm and 60.6"/1540mm high modules. Available in the full range of MFC finishes to match your chosen doors and finishing panels.

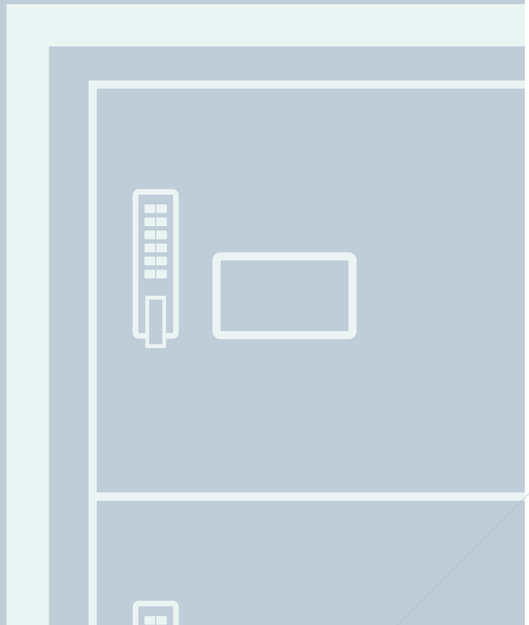
LOCKS

We design and manufacture the highest quality personal storage lockers, but we also have the knowledge and expertise on hand to advise you on the best lock choice.

Our wide range of secure locking options for LockerWall gives all employees – whether permanent, mobile or nomadic – a sense of control, peace of mind and belonging whilst in the office.

There are a variety of solutions to choose from. Wireless and hard-wired smart locks are compatible with the latest remote access technology, putting you in complete control. Or, more traditional key and combination locks are a great solution for visitors and shared storage spaces.

Speak to us about your locking requirements and we can recommend a solution to best suit your needs.

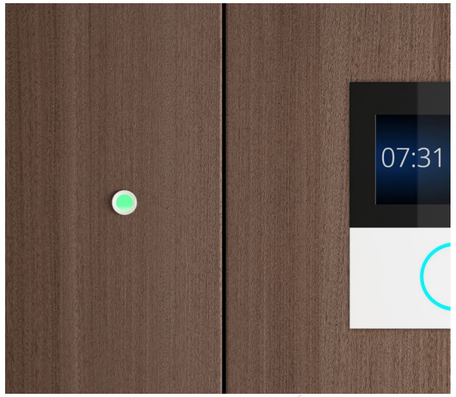


Smart Locking Solutions

Wireless Smart Locks

Wirelessly connected for efficiency and seamless worldwide integration, the latest smart locking technology, Digilink, allows management to remotely assign and manage users, access audit and analytics reports, schedule auto lock/ unlock and receive instant alarm alerts.

Working hand-in-hand with attractive RFID or keypad operated locks, these locks are recommended for our premium storage ranges, including LockerWall, for optimum security.



Hard-wired Smart Locks

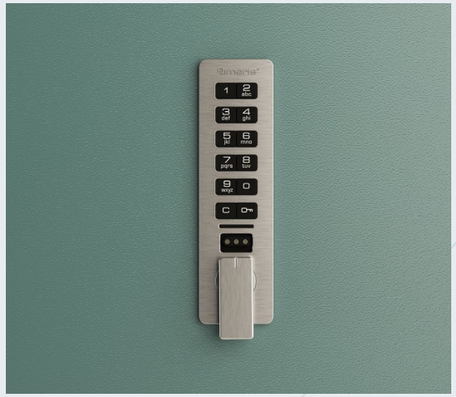
Hard-wired smart locks are sleek in appearance and offer convenient benefits with the management hardware and app packages available. The terminal can be fitted to a surface (e.g. mounted to a wall) or embedded directly into a bank of lockers, streamlining locker management by operating with new credentials or even pre-existing staff-ID cards. The management software offers a real time audit trail, utilization reports and the possibility to assign lockers from mobile devices.

LOCKS

Versa Mini Basic (RFID Lock)

A smart, swipe operated RFID lock option with a range of user accessories available including cards, wristbands and keyfobs.

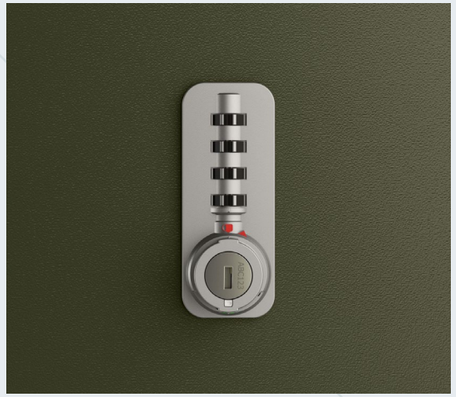
IP55 rated, these locks are suitable for humid conditions, include visual and audible indicators and can be set to shared or assigned use. Upgrade to the advanced Versa Mini lock which is compatible with a mobile app so management can easily manage users and power.



Versa Mini Basic (E4 Digital Lock)

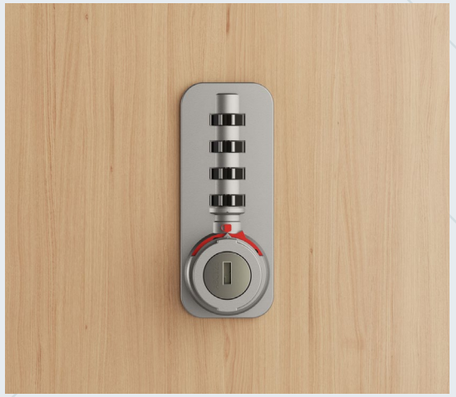
Suitable for shared and assigned use, this lock features secure four to seven digit codes and both visible and audible indicators. The advanced version of this lock, available as an optional upgrade, is also compatible with a mobile app to manage power and user credentials, amongst other remote features.

Speak to us about your locking requirements and we can recommend a solution to best suit your needs.



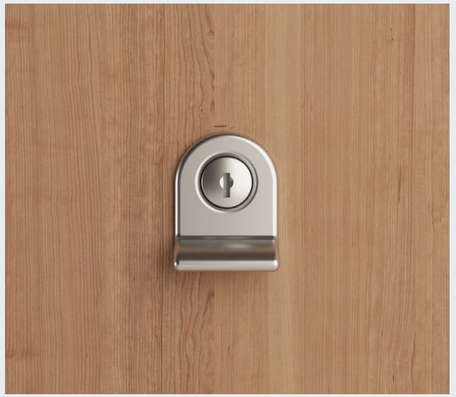
M3 Mechanical Locks (Assigned use)

The M3 Mechanical Lock is ideal for a single user, with secure four-digit codes, integrated scramble feature and a master key for management override.



M2 Mechanical Locks (Shared use)

All the benefits of the M3 Mechanical Lock, but more suited to public use with new user codes easily set up each time the lock is open.



AB Lock

AB locks are a great, cost effective option if you are looking for a straightforward, secure solution with user keys, ideal for both assigned and shared lockers.

FINISHING TOUCHES

LockerWall gives you the scope to create an efficient, stylish storage system for any kind of environment. It can be customised to fit entirely with you and your esthetic. And with the vast range of materials and finishes, including premium wood and CGL palettes and steel paints, LockerWall is entirely bespoke, allowing you to design a sleek system that suits your space.

OUR COMMITMENT

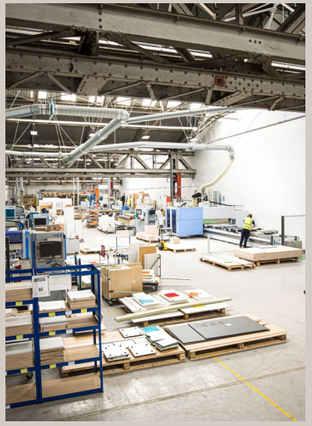
Better for you, better for the environment

As a proud British manufacturer, we take our responsibilities towards the environment very seriously, ensuring that sustainability runs through everything we do. Our dedicated Sustainability team ensures that our facilities are as sustainable as possible, while making sure that our products last and are sustainably sourced.

Bisley products are designed for functionality, durability, and a long service life. They are all tested rigorously to British and European harmonised standards for safety, strength and stability. We have also invested in the undertaking of Life Cycle Analyses (LCA) for much of our steel product portfolio, to fully understand their environmental impacts in terms of global warming, acidification, eutrophication, ozone depletion and other indicators across all phases of a product's life cycle - from cradle-to-grave. Our wood products are also FSC certified, meaning we can trace each piece directly back to the tree.

As for energy, we source all of the energy that powers our manufacturing activities through renewable energy tariff and we also participate in the Energy Savings Opportunity Scheme (ESOS), which has led to substantial investment in procurement and installation of energy efficient machinery and equipment.

But, we can always be doing more, and the team is constantly reviewing how we do things and how we might improve.



Visit bisley.com to find out more, or contact your Bisley Representative for more information on the LockerWall range.
