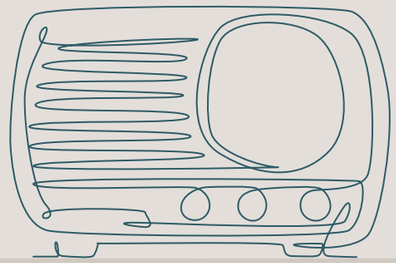
# Pren

BISLEY



# PREN

Introducing Pren, a collection of freestanding lockers, wardrobes, and cupboards that make specifying your entire storage system refreshingly simple.

With purpose beyond storage, Pren's freestanding units act as zone dividers throughout the office, creating defined neighbourhoods wherever you need. Contra-facing units available at multiple heights maximise storage throughout the workspace, and additional accessories including planter tops and sleek oversailing panels add mood-boosting biophilia, or create an extended standing height work bench.

Spanning warm wood-effect tones and solid colour finishes, Pren is available in a variety of laminates, matching LockerWall's broad palette, creating symmetry for your storage. And almost entirely made in-house, the lead times remain significantly shorter than average.

Pren's storage is designed to be entirely secure with a range of locking options. From smart, contactless RFID locking solutions, to the classic key or combination locks, you can relax and continue with your day, knowing your belongings are safely stored away.

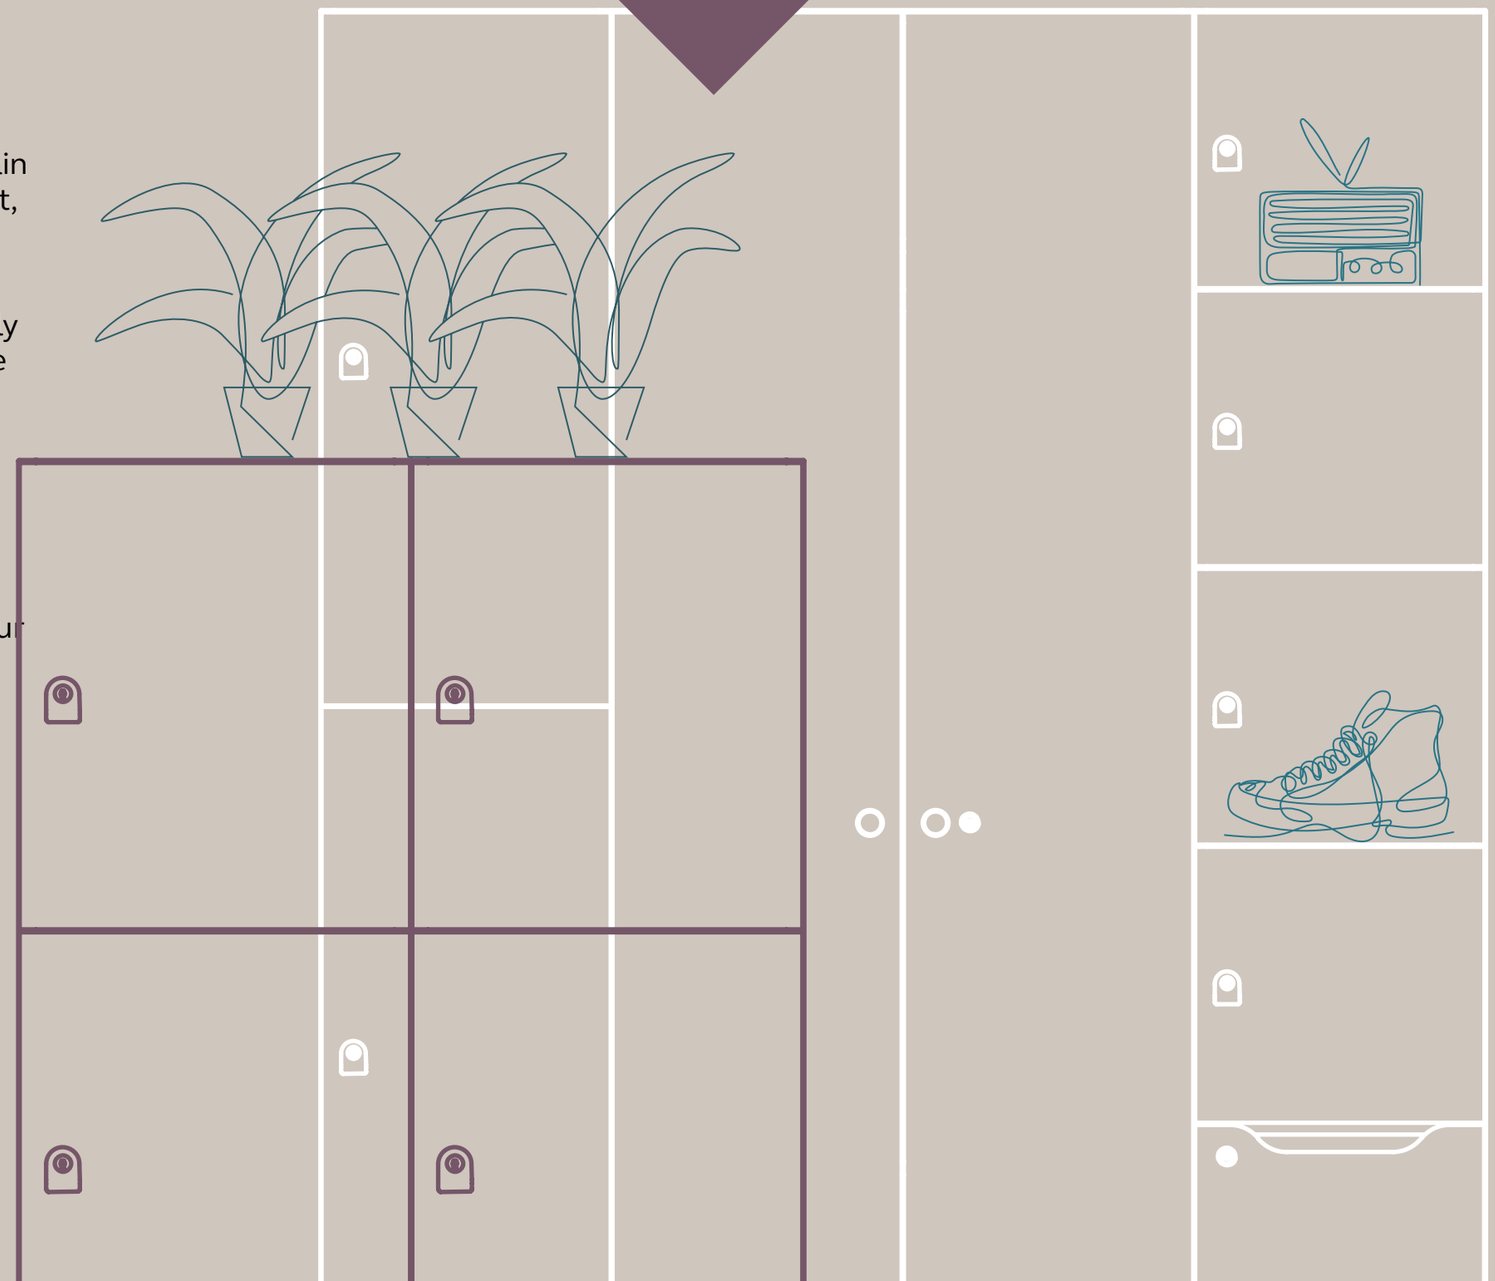
# WHY CHOOSE US?

Manufacturing excellence that’s engineered around you.

We’re proud to be a full manufacturer that really is Made in Britain – we manufacture all our own furniture at our factory in Newport, South Wales, and export all around the globe.

Our lead times are constant. We are the manufacturer and are not reliant on third-party suppliers. Continually acting responsibly and resourcefully concerning our environmental impact, we have invested extensively in our materials, machinery and processes, to reduce our environmental impact, while continuing to produce high-quality, long-lasing, durable products.

Pren combines generations of design and manufacturing knowledge with the simplicity of an easy-to-specify range. We have developed a collection of freestanding wooden workspace essentials that have the flexibility to complement your existing LockerWall installation or fulfil your entire  workplace storage needs.



# A perfect combination

Inspired by and designed to suite with our premium LockerWall range, Pren allows you to build upon your existing LockerWall installation, or complement it, without excess alterations and additional finishing panels.

You can even design your office space combining both Pren and LockerWall from the outset. Entirely freestanding, with a breadth of options, finishing touches and lock choices, Pren becomes the extension of LockerWall, integrating it throughout the office as space division, isolated storage zones and additional standing height work surfaces.

Both ranges share a laminate colour palette, with a choice of wood effect and neutral solid colours to bring warmth to your space. The palette has been designed to not only work seamlessly across Pren and LockerWall, but also offers contrasting finishes that work well together.

Pren works perfectly with LockerWall to maximise your space and storage requirements.

LockerWall. View the LockerWall brochure.

# Purpose beyond storage

Create zones and wayfinding throughout your office with Pren. The contra-facing design allows for dual-sided access, maximising usable storage space, while oversailing decorative tops keep joint lines to a minimum.

The lower height units are perfect for space division and give open-plan workplaces defined neighbourhoods. Separate focussed working zones from collaborative or breakout areas with Pren's additional fixtures – wooden planters which incorporate mood boosting biophilia, and sleek tops that double up as standing height worktops.

Wherever placed in the office, Pren fulfils your storage requirements while shaping dedicated working zones, maximising productivity within your workspace.

DOWNLOAD IMAGES

# A systems approach to storage

Pren makes specifying an entire floorplate surprisingly simple. The extensive range covers all aspects of workplace storage, from personal storage lockers and drawers, cupboards for filing and technology, or a place to hang your coat.

Your storage can support multiple possibilities in the workplace - the various height options are perfectly suited to form subtle space division in open plan environments.

Blending desirable workplace aesthetics with practical storage, Pren's clean design means there is no need to specify extra finishing panels; you can achieve an entire, uncomplicated, storage system, without compromising on cost.

Plus, all Pren units are 500mm deep, meaning any combination can be placed side-by-side or contra-facing. And with a variety of locking options available, your workforce can rest assured that their personal belongings are safely stowed away throughout the working day.

DOWNLOAD IMAGES

# Storage meets style

Complete a boardroom or meeting room with a contemporary credenza to create a focal point, with a place to store technology or guests' belongings.

Pair lower height cupboards and lodges together and opt for an oversailing top to create a luxurious addition to a meeting space. Pren cupboards feature round, solid wood handles for a smart, subtle design.

The palette of soft wood effect textures and modern neutrals available for Pren complement any colour scheme, and will blend beautifully with your brand colours, whether you are designing a new space or simply upgrading your storage.

DOWNLOAD IMAGES

# Good to know

- The entire Pren range shares the same 500mm depth, so lockers, wardrobes and cupboards can be neatly combined.

- Each unit includes full height finishing panels and a plinth meaning there's no need to specify additional materials. This also means that reconfiguration is easy should you choose to refresh your workspace, providing excellent value and longevity.

- Internal accessories such as shelves with under shelf filing* and coat rails are included, but additional accessories are available to order separately if you require them.

- Manufactured almost entirely at our factory in South Wales, keeping lead times to a minimum.

- The Pren range has a five-year guarantee.

# LOCKS

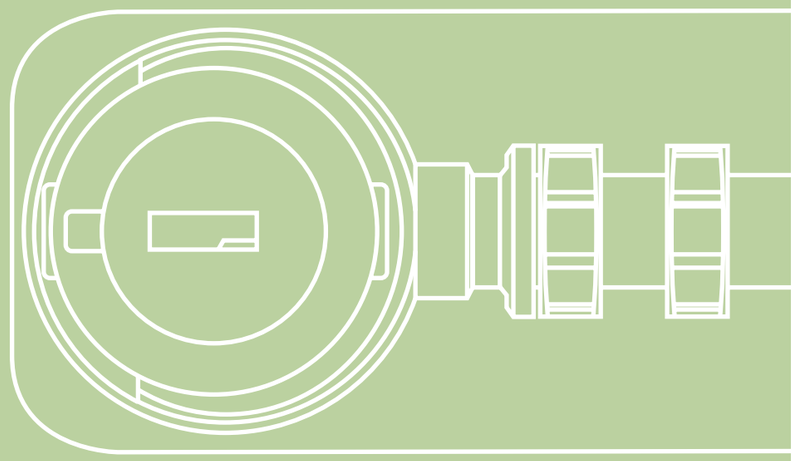
We design and manufacture the highest quality storage solutions, but we also have the knowledge and expertise on hand to advise you on the best lock choice.

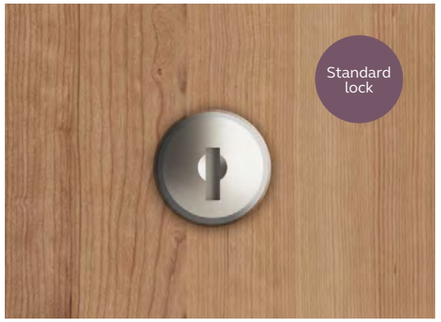
Our standard range of secure locking options for Pren gives all employees – whether permanent, mobile, or nomadic – a sense of peace of mind while in the office.

Whether you opt for a traditional key lock or a more advanced mechanical lock that can be programmed depending on the user, we work with a variety of the most trusted lock providers to meet even the most challenging privacy and security requirements of the modern workplace.

**Specifying Pren alongside a LockerWall installation?**

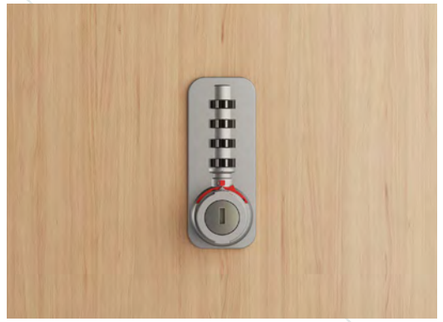
Rest assured your lock choice can be integrated across both products, meaning your entire storage solution can operate under one secure locking solution.





## AB Lock

AB locks are a great, cost-effective option if you are looking for a straightforward, secure solution with user keys, ideal for both assigned and shared lockers.



## M2 Mechanical Combination Lock (Shared use)

All the benefits of the M3 Mechanical lock, but more suited to public use with new user codes easily set up each time the lock is open.

## M3 Mechanical Combination Lock (Assigned use)

The M3 Mechanical Lock is ideal for a single user, with secure four-digit codes, integrated scramble feature and a master key for management override.

## Versa Mini Basic (RFID Lock)

A smart RFID lock option with a range of user accessories available including cards, wristbands and keyfobs.

IP55 rated, these locks include visual and audible indicators and can be set to shared or assigned use. Upgrade to the advanced Versa Mini lock which is compatible with a mobile app so management can easily manage users and power.

## Versa Mini Basic (E4 Digital Lock)

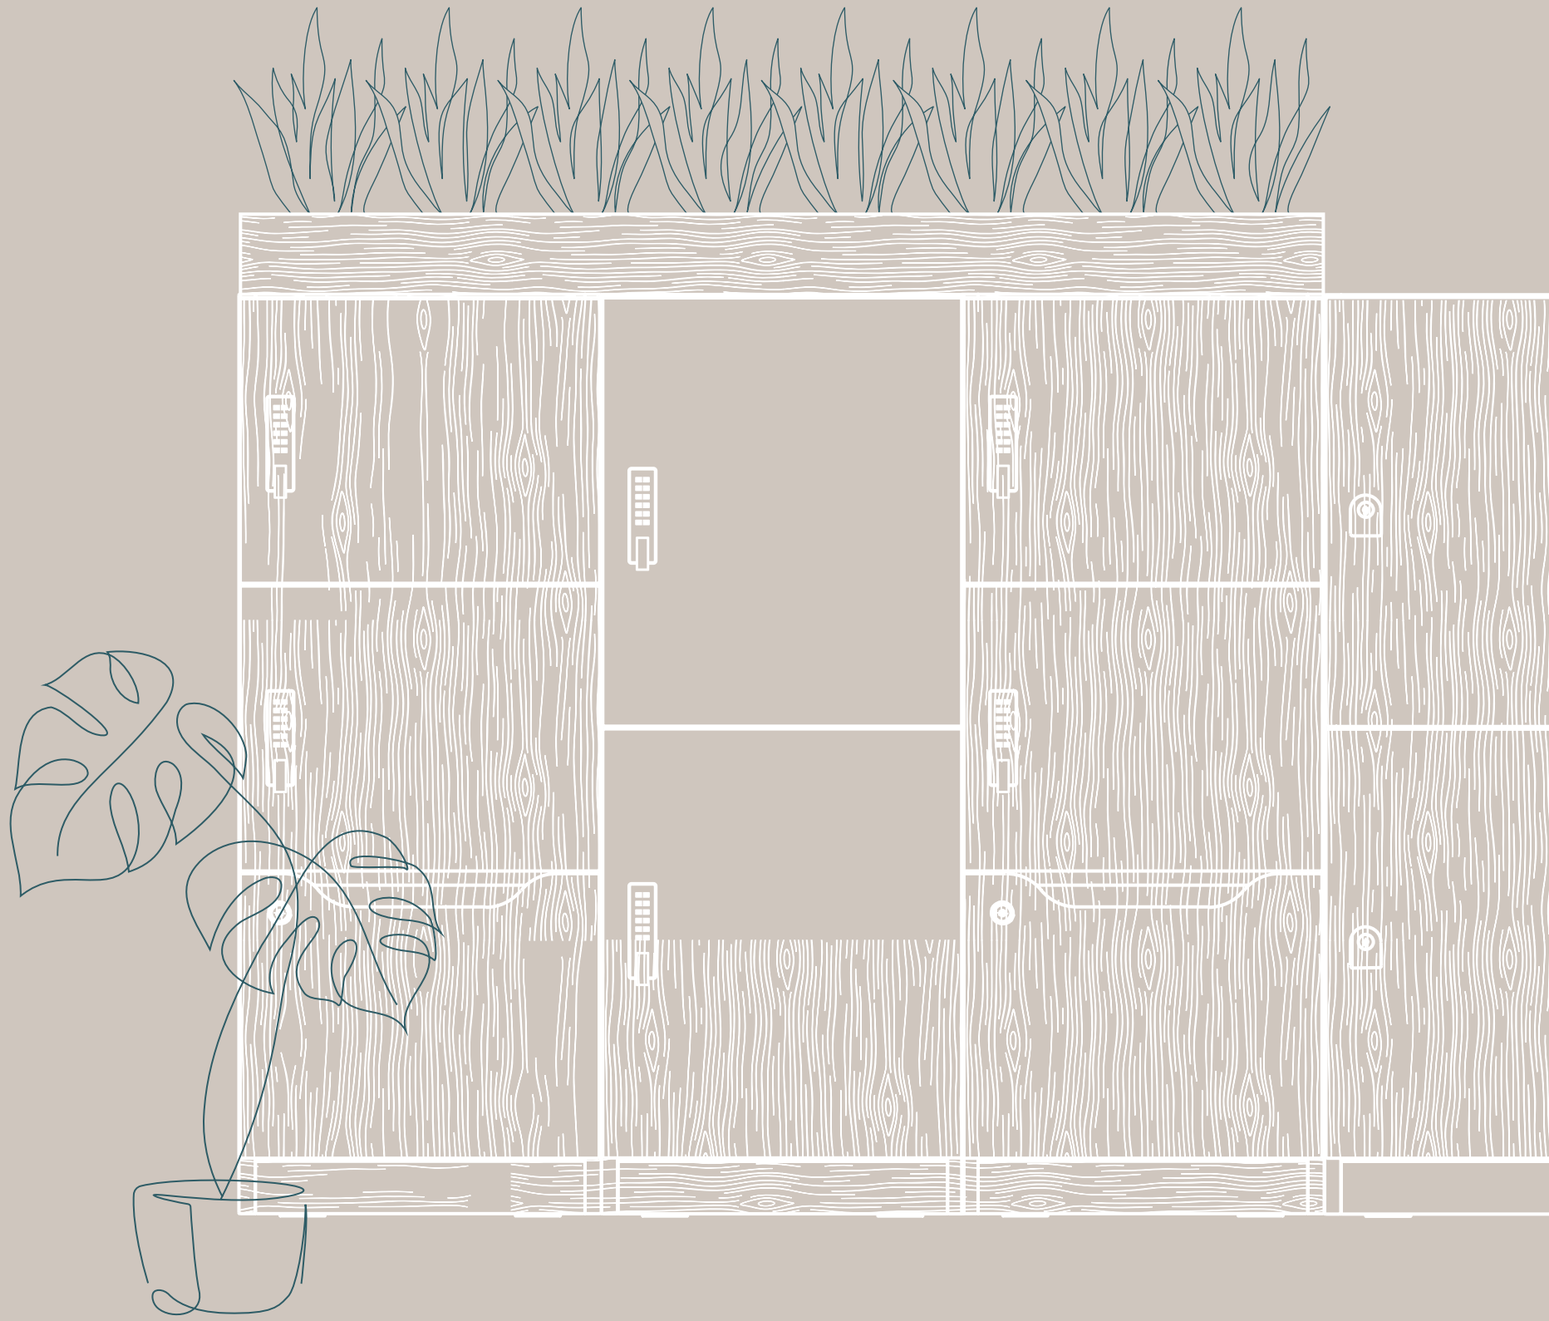
Suitable for shared and assigned use, this lock features secure four to seven digit codes and both visible and audible indicators. The advanced version of this lock, available as an optional upgrade, is also compatible with a mobile app to manage power and user credentials, amongst other remote features.

Speak to us about your locking requirements and we can recommend a solution to best suit your needs.

# FINISHING TOUCHES

Pren gives you the scope to create an efficient, multipurpose storage system for your entire workspace. It can be specified in a variety of beautiful laminate finishes to bring warmth and softness to your office, and match seamlessly with your LockerWall installation and brand aesthetic.

Additional laminate planters can be added to lower height units to introduce greenery and to subtly border different working zones. And oversailing tops can be applied to banks of units positioned together, minimising joint lines, while creating extra standing height workspace.



Visit bisley.com to find out more, or contact your Bisley Representative for more information on Pren.
